CERTIFIED MAIL

Chris Loutsis, Manager
Real Property Division
500 King County Administration Building
Seattle, Washington 98104

Dear Mr. Loutsis:

Seattle City Light's Georgetown Steamplant Flume - P.M.#240429-1-302

From time to time various persons have placed tile, metal or plastic drain pipes on Seattle City Light's land to drain water from other lands into the City's Georgetown Steamplant flume.

Due to the recent discovery of PCB contamination from unknown sources in the City's flume, the City will be removing the contaminated material and cleaning the flume. In the process of cleaning the flume, the City will be plugging most, if not all, of the drains that enter it.

If your adjacent property has any drains that enter the City's flume, you should immediately contact the proper authorities and relocate your drain into an authorized sewer system.

The cleaning of the flume should commence about October 1, 1985, so your immediate attention is needed.

You may contact one or more of the following persons for assistance:

Ray Rosen
Seattle City Light

Jeff:

*We have already
re-routed our drain
pipe, I think?*

*yes I don't know of any
others of ours that connect
to flume* ✓
